One Page Report-world Environment Day

1. **Name of The Event:** Celebration of **World Environment Day-2023**
2. **Date of Event:** 05/06/2023
3. **Time of Event:** 10:00 am
4. **Venue Of Event:** TSSMs BSCOER Lawn
5. **Event organized for:** All Teaching and non teaching staff
6. **No. of Teaching/ Non teaching Staff present or attended for Event:** 14
7. **Brief about Environment day.**

World Environment Day is celebrated on June 5 every year to raise awareness and encourage action for the protection of our planet. The theme for World Environment Day on 5th June 2023 focused on solution to plastic pollution under the campaign Beat Plastic Pollution. On this Environmental Day, the world comes together to celebrate our planets incredible biodiversity and raise awareness about the importance of environmental conservation. This year, we focuses on the nurturing the plants that were planted four years ago, highlighting the significance of long-term care and sustainability in our efforts to protect the environment.

Four years ago, we embarked on a mission to plant trees and restore green spaces as a response to the escalating climate crisis. The enthusiasm and commitment shown during that time were commendable, but now it is time to shift our attention towards nurturing these plants and ensuring their long-term survival. Nurturing the plants we planted four years ago is a testament to our dedication and responsibility as caretakers of the Earth.

It signifies our understanding that environmental conservation has consequences that extend far beyond the initial act of planting. To nurture plants effectively, it is essential to engage in activities that promote their growth, health and resilience

8. Outcome of Activity:

By focusing on nurturing the plants we planted four years ago, we not only ensure their survival but also provide an opportunity to reflect on our journey towards environmental sustainability. It reminds us that our efforts to protect the planet require continuous commitment, involvement, and collaboration.

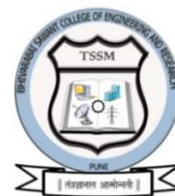

Environmental Day 2023 serves as a global platform to share success stories, best practices, and challenges faced in nurturing the plants of the past. Through this collective exchange of knowledge and experiences, we can develop innovative solutions and create a lasting impact on our environment. Let us come together on this Environmental Day and celebrate the beauty and resilience of nature. By nurturing the plants of the past, we contribute to a sustainable future for generations to come.

Glimpses of World Environment Day Celebration

Date: 05/06/2023 Time: 10:00 am Venue: TSSMs BSCOER Lawn

Prof. V. S. Dhote
ActivityIncharge

Dr. R. S. Karale
HOD (CE)

Name of Activity: **Tree Plantation Drive**

Date: 30th July, 2022

Time: 7.30 am

Place: Narhe Hills Near SwamiNarayan temple Narhe Pune

Activity Information:

NSS TSSM BSCOER had organized Tree Plantation on 30th July 2022 at Narhe Hills Near SwamiNarayan temple Narhe Pune. The Volunteers first of all took all the saplings to the Narhe Hill. Then Mr. Pravin Bhosale social worker addressed the volunteers about the role of trees in human life. He also mentioned that we should take utmost care of environment. The volunteers planted desi trees. These trees include, Peru, Neem, Pimple, etc. Some volunteers were assigned the task to give water and some were digging to plant trees. Volunteers planted 122 trees from 7:30am to 10.30 am. Mr. Pravin Bhosale, Prof. Bobade, Prof. Avinash Kale from “Plant tree Live the tree” organization and Prof. V.N. Tapase, Prof. Khatmode, NSS Program Officer Prof. D.D. Barale were present for the activity. Prof. D.D. Barale conclude the program.

Outcome of this Activity: Trees contribute to their environment over long periods of time by **providing oxygen, improving air quality, climate amelioration, conserving water, preserving soil, and supporting wildlife**. During the process of photosynthesis, trees take in carbon dioxide and produce the oxygen we breathe. It helped to spread awareness about tree plantation.
